DETAILED ACTION

Response to Arguments

1. Applicant's affidavit filed January 5, 2006 has been considered by the examiner and has overcome the prior art teachings of Novel's Digitalme and the rejection has been hereby withdrawn. The examiner has identified prior art that meets the applicant's claim language and a rejection of the claims has been issued.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Nielsen, U.S. Patent 6,006,333.

As per claim 1, it is taught by Nielsen of a method of managing and linking a user's personal authentication credentials data over a network, comprising the steps of: registering the user with a secure system; creating a personal homepage and personal database for the user by the system; inputting the user's authentication credentials for a

plurality of third parties into the personal database; linking to one of the plurality of third parties by the user; retrieving and securely transmitting appropriate authentication credentials for the one of the plurality of third parties by the system; and logging the user onto the one of the plurality of third party sites (col. 2, lines 12-37).

As per claims 2 and 15, Nielsen discloses of registering comprises inputting master authentication credentials into the system by the user (col. 1, lines 63-66 and col. 2, lines 35-37).

As per claims 3 and 16, Nielsen teaches that the master credentials include a unique user name and a unique password (col. 1, lines 63-66).

As per claims 4 and 17, it is disclosed by Nielsen of inputting authentication credentials for a plurality of third parties is performed by the user (col. 1, lines 58-66 and col. 2, lines 12-20).

As per claims 5 and 18, Nielsen teaches of inputting authentication credentials for a plurality of third parties is performed by the system (col. 2, lines 15-27).

As per claims 6 and 19, Nielsen discloses that the personal homepage contains authenticated links to the plurality of third parties (col. 2, lines 27-37).

As per claims 7 and 20, it is taught by Nielsen of linking comprises the step of clicking on a link to one of the plurality of third parties resident on the personal homepage (col. 2, lines 27-37).

As per claims 8 and 21, it is disclosed by Nielsen wherein the step of linking comprises going to a third party Web site by the user; clicking, by the user, on an icon representing the system; inputting authentication credentials for the third party into the

personal database by the user; and linking to the third party Web site by the system (col. 1, lines 63-66 and col. 2, lines 12-15).

As per claims 9 and 22, Nielsen teaches of linking comprises the step of clicking on a third party icon on the personal homepage (col. 2, lines 12-22).

As per claims 10 and 23, it is disclosed by Nielsen wherein the step of linking comprises the steps of inputting, by the user, information about a third party Web site into system; requesting, by the user, the system to search for the third party Web site; and finding, by the system, the third party Web site and presenting a link to the third party Web site to the user (col. 1, lines 63-66 and col. 2, lines 18-24 & 35-37).

As per claims 11 and 24, it is taught by Nielsen wherein the step of retrieving and securely transmitting comprises the steps of opening a new browser window by the system; transporting user authentication credentials to the third party Web site by the system; and inputting the authentication credentials to the third party Web site (col. 4, lines 28-35).

As per claim 12, Nielsen discloses that the system encrypts the user authentication credentials (col. 2, lines 12-15).

As per claim 13, Nielsen teaches that the personal database contains personal data that is not authentication credentials (col. 5, lines 40-47).

As per claim 14, it is disclosed by Nielsen of a method of creating business incentives during e-commerce comprising the steps of registering a user with a secure system; registering a third party merchant as a participating merchant with the system; creating a personal homepage and personal database for the user by the system;

inputting the user's authentication credentials for a plurality of third parties, including at least one participating merchant, into the personal database; linking to the at least one participating merchant by the user; retrieving and securely transmitting appropriate authentication credentials for the at least one participating merchant by the system logging the user onto the at least one participating merchant; purchasing a product by the user from the at least one participating merchant; and receiving, by the system, compensation from the participating merchant (col. 2, lines 12-37 and col. 4, lines 28-35).

As per claim 25, it is taught by Nielsen that the step of purchasing a product includes obtaining proprietary information from the third party Web site (col. 4, lines 28-35).

As per claim 26, Nielsen discloses wherein compensation is a percentage of a price of the product purchased (col. 4, lines 28-35).

As per claim 27, Nielsen teaches wherein compensation is based upon the online visit, and/or products purchased, and/or services purchased (col. 4, lines 28-35).

As per claims 28,32,36, and 40, it is disclosed by Nielsen of the user that goes from the third party/merchant to a second third party/merchant site, initiating an authentication process, retrieving from the system and/or third party/merchant site and securely transmitting by the system and/or third party/merchant site appropriate user authentication credentials for the second third party/merchant site and logging the user into the second third/merchant site (col. 2, lines 12-27).

As per claims 29,33,37, and 41, it is taught by Nielsen that the system and/or third party site encrypts the user authentication credentials (col. 2, lines 12-15).

As per claims 30,34,38, and 42, Nielsen discloses that the authentication process includes personal data that is not authentication credentials (col. 5, lines 40-47).

As per claims 31,35,39, and 43, it is disclosed by Nielsen that the user accesses the system and/or third party sites using a device capable of accessing the network (col. 2, lines 12-23).
